DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a method for generating billing record for a telephone call. A transaction record is received including transaction data corresponding to at least one telephone call placed by a subscriber. The transaction data is processed by a plurality of rate plans, each rate plan generating a toll amount corresponding to the telephone calls of the transaction record. The toll amounts from each of the plurality of rate plans are compared to determine a lowest toll amount. An amount x is deducted from the lowest toll amount to form a final toll amount. A billing record is generated for the subscriber based on the final toll amount.

Prior art of record failed to teach or fairly suggest in combination the method of generating a billing record by a telecommunication service provider for at least one telecommunication service subscriber, the method comprising: retrieving sample telephone call transaction data for the subscriber; processing the sample telephone call transaction data in accordance with service rate plans of competitive telecommunication service providers; generating an estimated toll amount for the transaction data for each service rate plan; comparing estimated toll amounts; based on the comparison, determining a lowest toll amount; deducting a constant amount from the lowest toll amount; based on the deduction, forming a final toll amount; and generating the billing record for the subscriber based on the final toll amount.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
